LIVONGO FOR DIABETES PROGRAM

A New Approach to Diabetes Management

We combine the latest technology with coaching to make diabetes management easier so our members can live the life they want.

PROGRAM OVERVIEW

**Advanced Meter:** The Livongo meter uses cellular technology to automatically upload blood glucose readings to provide members with real-time insights. The meter can seamlessly share data between members, their family, and healthcare providers.

**Real-time Data Analytics:** Leveraging a personalized rules engine we deliver insights and educational content to members at the times that matter most.

**24/7 Personalized Support:** We provide members with coaching to make better diabetes management decisions via our meter, mobile app, and coaches. Our coaches are Certified Diabetes Educators and available 24 hours day to answer diabetes questions or for real-time acute interventions.

**Unlimited Testing Supplies:** We provide members with as many test strips and lancets as they need and ship these supplies directly to them.

PROGRAM IMPACT

*“I feel in control about managing my diabetes and it’s easier for me to make better eating choices.”*

— Eric V.
Livongo Member
